

- Return Policy:

The Buyer may return the cat/kitten to the Breeder for any reason within 7 days. 100% of the purchase price will be refunded. Following that period, refunds will be at the breeder's discretion. And will not exceed the resale price, payable upon resale.

Seller/Breeder will not pay for transportation, vet re-check fees or paperwork costs incurred by the Buyer for this cat/kitten or for any replacement cat/kitten. Buyer will provide at their expense any necessary health certificate, and at the Breeder's option a new FeLV/FIV test, dated within three days prior to returning the cat.

Breeder retains the right to refuse the return of a sick or infectious cat/kitten until the cat/kitten is well.

Any cat/kitten taken back by the breeder because of negligence or improper care will not be subject to the above stated refund policy.

Breeder's liability to the Buyer shall not exceed the purchase price of this cat/kitten.

HEALTH GUARANTEE

- Breeder guarantees the cat/kitten to be in excellent health at the time of purchase--free of parasites, fungus infection, viral and bacterial disease and congenital birth defects. Buyer is required to have a licensed veterinarian examine the cat/kitten within two working days of delivery in order for our health guarantees to apply. If the veterinarian, upon examination of cat/kitten, determines that illness was present prior to sale, the Breeder must be contacted before treatment is begun (except in emergency situations). In the event of a dispute the Breeder reserves the right to have cat/kitten taken to another veterinarian of the Breeder's choice for a second opinion, for which Breeder will pay the cost. This second opinion will be the deciding diagnosis. The Buyer has the option of returning the cat for any reason to the Breeder within seven days of purchase date for a refund of the purchase price paid. Buyer will pay all transportation costs for the return of the kitten. The Breeder will not be liable for any medical costs associated with the cat or kitten that the Buyer incurred. Should the Buyer elect to keep the cat or kitten in lieu of returning the cat for a refund, the Buyer retains all liability for future medical costs. Breeder also reserves the right to refuse the return of a sick or infectious cat until it is well again.
- If the cat/kitten should die from an illness present prior to sale, the Breeder, at the Breeder's option, shall replace said cat/kitten with one of equal value or refund the purchase price. Should this cat/kitten die of any genetic or congenital defect before one year of age the Breeder, at the Breeder's option, agrees to provide a replacement kitten (when available) or refund the purchase price. To qualify for this clause, the Breeder must receive a written necropsy report, including toxicology and histology reports from an established pathology laboratory. Buyer is responsible for all costs associated with the exercise of this clause.
- Breeder has given this cat/kitten a minimum of three vaccinations against feline URI at the time of delivery. Buyer agrees to vaccinate this cat/kitten as appropriate. Breeder does not recommend using FeLV or FIP vaccine. Should the Buyer use these vaccines on the cat/kitten, the Breeder will not replace the cat/kitten should it subsequently develop FIP.
- Cats sold with breeding rights are guaranteed fertile, unless infertility is the result of poor husbandry practices, injury, disease, or infection occurring after purchase. If the cat is over two years of age, has been unsuccessfully bred three times to at least two different proven studs/queens and a veterinarian declares the cat is in excellent health but infertile, the Breeder, at the Breeder's option, shall take back ownership/possession of the cat and replace the cat with one of equal value, refund the difference between the purchase price paid and the Breeder's pet price (\$700) if the cat has been subsequently altered or refund the entire purchase price of the cat and take back ownership/possession of the cat. Buyer will pay all transportation costs for the return of the cat/kitten and replacement cat/kitten
- Breeder requests that the Buyer isolate the new cat/kitten from their other cats and kittens for a period of 21 days. New kittens may show signs of stress including, but not limited to, sneezing, discharge from the nose or eyes, diarrhea and/or constipation. These effects can be minimized by feeding identical food as served by the Breeder (raw diet – see http://www.koontucky.com/raw_index.html), offering bottled or distilled water and overall taking measures to reduce stress during the integration period.
- Breeder will not knowingly sell a cat/kitten with a detectable defect. However, should a defect in the cat/kitten develop or arise after leaving the Breeder's home, which would disqualify said cat/kitten from being used for breeding, Breeder shall (if said cat/kitten has **not** been used in a breeding program) replace the cat/kitten or refund the difference between purchase price and pet price. Said defect must be documented by a veterinarian and the cat/kitten altered without having produced viable kittens. Breeder's pet price for female kittens is \$700 and \$700 for male kittens. Buyer must notify Breeder immediately of any genetic defect that arises throughout the life of this cat.

Hip Dysplasia: if this cat/ kitten is properly x-rayed (under isoflourine anesthesia and laid out properly) for hip dysplasia after the age of 10 months and if the x-rays are sent to The Orthopedic Foundation for Animals (OFA) who subsequently

rates the cat/kitten as having mild to severe hip dysplasia, the Breeder, at breeder's option, will replace the cat/kitten or refund the difference between sale price and pet price to the Buyer if the cat/kitten has not been used for breeding and is immediately altered. If the cat has been used for breeding then the Breeder will not provide any replacements or refunds.

HCM: This cat shall undergo an echocardiogram (ultrasound of the heart) with color flow Doppler imaging, prior to being bred. This exam is to be performed by a board certified cardiologist. If the cat has not been tested prior to breeding and subsequently develops HCM, the seller will not provide any replacements or refunds. This cat is to undergo annual testing for HCM. No replacements or refunds will be given for HCM without this testing.

-
- If the buyer is found to be in violation of any of these terms and conditions, Breeder retains the option to sue the Buyer in ... for breach of contract and requires immediate, unconditional return of cat/kitten to the breeder. Any contractual dispute will be tried in... Buyer to pay all court costs, traveling expenses and attorney's fees.
 - Buyer will pay the breeder a non-refundable deposit of half of the Purchase price at the time of signing this contract. The balance of the Purchase price is to be paid at least one week in advance of shipping or delivery of this cat/kitten. Payment must be made in \$USD funds by check, wire payment, PayPal or money order. Use of PayPal may incur a 3.9% fee. Buyer understands that the Purchase price does not include the costs of shipping the cat/kitten to the Buyer (carrier, shipping fee, rabies vaccination, blood work, and health certificate) or for individual registration.
 - Electronic signature is legal and binding.

Additions or amendments to the above must be initialed by Buyer and Breeder.

I AM IN FULL AGREEMENT AND AGREE TO ABIDE BY THE TERMS AND CONDITIONS OF THIS SALES CONTRACT.
